North Star Academy

North Star Academy provides an educational environment that is designed to meet the unique needs of high achieving students and to enable them to develop to their fullest potential.

Meet North Star Academy

Grades: 3-8

North Star Academy allows students a compacted curriculum approach to mastering the core subjects so that they can move ahead at their own pace and have more time during the school day to pursue a deeper understanding of the curriculum and pursue enriching activities.

Enrichment activities at North Star reflect the diverse interests and passions of teachers and students, including field trips, a robust performing arts program, multimedia presentations, engineering, chess, robotics, computer programming, comic book making, science fiction studies, visual arts, after school sports, and independent study.

North Star Academy students thrive because the staff nurtures our students' social and emotional needs, in addition to their academic desires. Our very engaged and supportive parent community provides volunteer support in and out of the classroom, as well as before and after school.

For these reasons and more, we invite you to **meet, choose and love North Star Academy.**

Programmatic Focus:

Educational Environment Focusing on the Unique Needs of Highly Capable Students

The program focuses on the combination of creativity, task commitment and high academic rigor, to support students in developing to their fullest potential. The pace of responsive instruction, the depth and complexity of the grade level curriculum, the types of assignments, and the range of experiences provide a learning atmosphere that promotes excellence. All students are expected to demonstrate personal growth through the development of self-discipline, leadership skills, community involvement, and character growth.

"North Star Academy is great because the students are eager to learn and they bring a lot of enthusiasm to their studies, and they really try to make this school an environment for learning."

Leona Das, 8th grader at North Star Academy

North Star Academy is a part of
the Redwood City School District
